THE PROFESSIONAL GRADE CROSSOVER.

At GMC, we engineer all our trucks, vans, SUVs and crossovers to a higher standard. As a result, our Acadia performs without the compromises other crossovers require. There’s abundant space for up to eight adults in the well-appointed cabin. And when you need to haul serious cargo, Acadia reconfigures easily to help get the job done. The 288-horsepower 3.6-litre DOHC V6 engine puts performance at your disposal, yet Acadia consumes a mere 9.4 km of fuel per 100 kilometres on the highway.* Acadia drivers also enjoy the assurance of the best coverage in Canada, including a 5-year/100,000-kilometre limited powertrain warranty. There’s even a range of models to help you choose the one that best suits your needs, including a choice of front or all-wheel drive and the new luxurious Acadia Denali. The 2011 Acadia from GMC. Why settle for less than professional grade?

* 2011 Acadia FWD fuel consumption ratings based on GM testing in accordance with approved Transport Canada test methods. Your actual fuel consumption may vary. For more information go to gmc.gm.ca

READY FOR ITS CLOSEUP.

With its powerful stance and graceful lines accented by just the right amount of brilliant chrome, Acadia is contemporary family transportation at its most attractive. Acadia continues to impress on close inspection, too, thanks to details like tight panel gaps, sculpted projector-beam headlights and fast-illuminating LED tail lights. Even more important, the Acadia body is as functional as it is beautiful. More than 5000 hours of refinement in the wind tunnel have resulted in a drag coefficient of just .344. That means you enjoy a hushed highway ride and improved fuel efficiency.
YOU DESERVE AN UPGRADE.

No matter which Acadia model you choose, you’ll enjoy a ride that’s a considerable step above the ordinary. Acadia’s long wheelbase and wide track dimensions contribute to a spacious, open cabin. A low step-in height makes it easy to enter and exit, and thanks to the standard SmartSlide second-row seating, accessing the third-row seat is a breeze. The amenities are both intelligent and sophisticated and range from a standard tire pressure monitoring system to an available rear DVD entertainment system featuring stunning Bose® 5.1 surround sound audio. The result is a stylish and extremely comfortable driving environment that defines first class.

SEATING CONFIGURATIONS

When you need to carry large cargo — or a combination of passengers and cargo items — reconfiguring Acadia’s interior is a very simple matter. All 2nd- and 3rd-row seatbacks fold flat to create a convenient and practical load surface. In fact, Acadia has 35% more maximum cargo capacity than Honda Pilot.*

* Competitive information based on 2010 Model Year and latest published information available at time of printing.

SMARTSLIDE SEAT

All Acadia 2nd-row seats include a SmartSlide feature that allows them to be moved forward for easy access to the 3rd-row seats. As the seatback slides forward, the rear edge of the seat cushion automatically moves up and forward to provide extra space.
ACADIA DENALI: IT SUITS YOUR STYLE.

Named after North America’s tallest mountain, Acadia Denali is the pinnacle of crossover style. Premium details abound, including chrome-clad 20-inch wheels, unique body-colour front and rear fascias, fender flares and rocker panel treatment. And, of course, the signature Denali honeycomb upper and lower grilles. Best of all, Acadia Denali delivers this premium presence without sacrificing a thing in terms of performance, versatility or efficiency. So it suits your needs, as well as your style.

DENALI FEATURES

Includes all of the premium equipment features of the Acadia SLT-2 plus:

- All-wheel drive
- Signature Denali honeycomb grilles
- Unique lower front and rear fascias
- High-intensity discharge (HID) headlights
- Body-colour lower cladding and rocker moldings
- Body-colour rear fascia and fender flares
- Unique bodyside moldings with chrome accents and Denali badges
- Denali-specific dual chrome exhaust tips
- 20” chrome-clad aluminum wheels with black chrome spoke inserts
- P255/55R20 H-rated tires.
If you’re looking for contemporary luxury in a seven- or eight-passenger crossover, Acadia Denali is a must-drive vehicle. The ride is controlled, comfortable and quiet. The cabin is trimmed in fine quality materials, including leather and genuine mahogany wood accents. And because Acadia Denali was developed by the engineers at GMC, it also features the best of integrated technology, such as an aircraft-inspired Head-Up Display (HUD). It projects key information on the inside surface of the windshield to keep you informed without distracting you from the road ahead.

DENALI FEATURES
Includes all of the premium equipment features of the Acadia SLT-2 plus:

- Perforated-leather seating surfaces with matching leather door panel trim
- Heated and cooled driver and front-passenger seats
- Leather-wrapped steering wheel with mahogany wood inserts
- Genuine mahogany woodgrain accents on instrument panel and centre stack
- Premium acoustic dampeners – laminated glass and liquid-applied sound deadeners
- Lighted chrome sill plates with Denali logo
- Dual SkyScape sunroof system, with sliding front section and fixed rear section
- Head-Up Display (HUD) instrumentation
- Rear cargo area sound system controls

Premium features that provide an unsurpassed driving experience abound within Acadia Denali.
A NOTE ON CHILD SAFETY: Always use safety belts and proper child safety seat instructions for more information.

According to information published by the US Department of Transportation’s National Highway Traffic Safety Administration, more than 1,000 children are killed in car crashes each year. The single most important factor in reducing the likelihood of an injury during a crash is the use of safety belts. Newer vehicles come with advanced safety systems, but safety belts remain the most effective.
What happens when you unleash GMC’s obsessive truck engineers on a crossover? They endow it with some of the most sophisticated automotive technologies on the planet. Under the hood, Acadia features a high-tech V6 with direct fuel injection, Variable Valve Timing (VVT) and more. You enjoy substantially more power than Honda Pilot*, along with better highway fuel efficiency.** Acadia’s technological edge continues inside the vehicle, too. Bluetooth® phone connectivity, ultrasonic rear park assist and a rearview camera system are all standard on all models except Acadia SLE-1. For your entertainment, standard XM Satellite Radio† offers a host of channels and crystal-clear digital sound. You can even spoil your second- and third-row passengers with an available rear DVD entertainment system complete with an overhead LCD display.

* Competitive information based on 2010 Model Year and latest published information available at time of printing.

LIFE DEMANDS VERSATILITY.

It’s said that in modern life, change is the only constant. Fortunately, Acadia is designed to handle life’s varying challenges with grace and style. One minute, the stylish cabin may be transporting up to eight people in comfort. The next it might be handling a best-in-class 3282 litres of cargo.* Loading and unloading are a breeze, thanks to the available rear power liftgate and the low rear liftover height. Acadia’s standard roof rails make it a simple matter to attach a variety of racks and cargo boxes when you need to transport bicycles, snowboards and other gear. And for the really big jobs, like getting the boat to the lake, Acadia is rated to tow up to 2359 kg (5200 lb.)** – the most of any vehicle in its class.*

*[Based on Ward’s 2010 Large Cross/Utility segmentation and latest published competitive information available at time of printing.]

**Requires available Trailer Towing Package.

LOW STEP-IN AND LIFTOVER HEIGHT

Body-frame integral construction allowed the Acadia engineers to eliminate the separate frame rails found in traditional SUVs. That means a reduced ride height, more convenient access to the passenger compartment and a lower rear liftover height.

REAR POWER LIFTGATE

Acadia’s rear power liftgate raises and lowers at the touch of a button – a handy feature when your hands are full. It’s standard on Acadia SLT-2 and available on Acadia SLT-1.
